WHY DELTA-STADIUM?

DELTA-stadium is an easy-to-operate solution with a user-friendly and intuitive interface . It synchronizes playlists and screens with high precision, elevating live events to a whole new level of fan engagement.

Why should you limit yourself to a few layers and graphics per production?
DELTA-stadium and its DELTA-CG graphic engine does not limit you to the number of graphic elements you want to add to your production.

Why not having the freedom to change your ideas at the last minute?
DELTA-stadium and its Template Editor allows real-time editing to always get the best versions of your graphics chart on air.

Do you want to integrate an input stream into your DELTA-stadium?
DELTA-stadium integrates NDI, HDMI (optional) or SDI (optional) input support allowing the integration of external streams into your graphic compositions. And with its integrated ChromaKey, you have a ton of use case to choose from...

Want to stay in control at your fingertips?
With its Stream Deck, and XKeys support, DELTA-stadium offers you the possibility to trigger one or more actions on multiple playlists. This guarantees you a secure and direct control of all actions repeated during your production. You can also use a tablet or phone as a remote control thanks to its easy-to-use launchpad and a WebAPI integration.

Do you want to maximize the relevance of your graphical layers data?
DELTA-stadium integrates support for a wide variety of data files ensuring easy integration with your production team's data sources.
